

Review—of *Mr. Moulton's Voyage to Staten-Land, Massafuero, and other Places in the Southern Hemisphere*, p. 51; of *Capt. D. Azara's Natural History of the Quadrupeds of Paraguay*, p. 64; of the *Life and Revolutionary Sufferings of Capt. Talbot*, p. 71; of *Baron's Elucidations, Discoveries, and Improvements in Mathematical Science*, p. 77; of *Surgeon Deveze's Dissertation on the Yellow Fever at Philadelphia in 1793*, p. 80.

To which are added, twenty-eight Articles of Intelligence, in *Natural History, Manufactures, Meteorology, fine and useful Arts, Medicine, and concerning Alkaline Antiseptics, and the Steam Engine*, from p. 86 to 124.

No. II.

- I. *Account of the Epidemic Disease which prevailed at and around Augusta, in Georgia, 1804. By Dennis Smelt, M. D. of Augusta* p. 125
 - II. *A Case of unequal morbid Excitement, in which Blood-letting seemed to be the principal Remedy. By Dr. Aaron C. Willey, of Block-Island* 128
 - III. *Account of Diseases as they appeared in several Parts of the District of Maine, 1803. By Dr. Jeremiah Barker, of Portland* 132
 - IV. *Continuation of Dr. White's History of the Diseases prevalent at Waynesborough, in 1802* 140
 - V. *Description of the City of Tripoli, in Barbary, with Observations on the local Origin and Uncontagiousness of Plague. By Jonathan Cowdery, Surgeon to the late Frigate Philadelphia, and a Captive there* 154
 - VI. *Observations on the Union of Arteries, and the Treatment of Aneurism. By Thomas Ewell, M. D. of George-Town, Maryland* 159
 - VII. *Continuation and Conclusion of Dr. Duvall's History of the Season and Diseases of 1804, in Maryland* 165
- Reviews—of *Moseley's Treatise on Tropical Diseases, and on the Climate of the West-Indies*, p. 178; of *Lindley's Narrative of a Voyage to Brazil*, p. 195; of the *Massachusetts Papers on Agriculture*, p. 204; of *Brower's Popular Treatise on the Yellow Fever*, p. 207; of a *French Sketch on the Situation of Louisiana*, p. 210.
- To which are subjoined, twenty-one Articles of important Information relative to Yellow Fever; its local Origin,

CONTENTS.

xi

Uncontagiousness and Medical Treatment: concerning the System of European Quarantines; their Uselessness as Safeguards against the Plague; the wretched Policy of applying them to Yellow Fever; the Injury done thereby to the American Character and Commerce; and the Quarantine Manifestoes of the foreign Consuls resident in the United States, and other Matters, extending from p. 211 to 236.

No. III.

- I. *A Memoir on the Materiality of Caloric. By Thomas Ewell, M. D. of George-Town, Maryland* p. 237
 - II. *Further Continuation and Conclusion of Dr. White's Description of the Diseases prevalent in Georgia* 241
 - III. *Case of Inflammatory Remittent Fever, illustrating the Effects of Blood-letting. By Dr. Joshua E. White, of Savannah.* 249
 - IV. *A Case of Tetanus, from which the Patient recovered. By James Archer, M. D. of Harford County, Maryland* 253
 - V. *Observations on the Yellow Fever of North-America. By Dr. James Speed, of New-Orleans* 259
 - VI. *A Case, showing the Impropriety of taking the whole of the Virus out of a Vaccine Vesicle. By Frederick Dalcho, M. D. of Charleston, South-Carolina* 264
 - VII. *Efficacy of the Sugar of Lead in Hysterics and St. Vitus's Dance. By Dr. Aaron C. Willey, of Block-Island* 266
 - VIII. *Remarks on the Origin and Cause of the Yellow Fever, and on the Means of Prevention. By Dr. William Baker, of Bladensburgh, Maryland* 268
- Reviews—of the remaining Part of Volney's *Picture of the Soil and Climate of the United States*, p. 276; of Tuckey's *Voyage to Portuguese America and New-South-Wales*, p. 287; of Gardiner and Hepburn's *American Gardener*, p. 297; and of Ruston's *Letters on the Yellow Fever*, p. 304.
- To which are annexed, forty-seven Subjects of new and instructive Kinds, concerning the great Discoveries lately made in Upper and Lower Louisiana, by Messrs. Dunbar, Hunter, Soulard, Trudeau, Lewis, and Clark; on Chemistry, Meteorology, Mineralogy, Medicine, Astronomy, and Therapeutics, from p. 305 to 348.*

No. IV.

- I. *Cursory Observations on the Soil, Climate and Diseases of Georgia.* By Joshua E. White, M. D. of Savannah 349
 - II. *Remarks on the Treatment of Burns by Cold Water; together with Observations on the Yellow Fever.* By Maxwell M'Dowell, M. D. of York, Pennsylvania p. 366
 - III. *A Case of Tetanus, which terminated in Recovery.* By Dr. Philemon Tracy, of Norwich, in Connecticut 368
 - IV. *Observations tending to prove that the Yellow Fever in Spain was of local Origin, and not imported from America or elsewhere.* By Felix Pascalis, M. D. of New-York 376
 - V. *Remarks on the Means of preventing Yellow Fever.* By Valentine Seaman, M. D. in a Communication to the Board of Health of New-York 391
 - VI. *Case of Febrile Disease, attended with Malignant Symptoms, and black Vomiting, occurring in the Winter Season.* By Valentine Seaman, M. D. of New-York 395
- Reviews—of Harris's *Tour to Ohio*, p. 397; of Drayton's *View of South-Carolina*, p. 399; of Roberts's *Pennsylvania Farmer*, p. 403; and of Rand's *Observations on Phthisis Pulmonalis*, p. 412.
- To which are added, twenty-six Articles of Medical, Economical, Physical, and curious Intelligence, from p. 419 to 446; and an Appendix, containing Dr. Mitchill's Speech in Congress in 1803, on Quarantine Establishments, p. 447 to 454.
